

This architectural section drawing illustrates a long, low building facade. The roof is characterized by a series of repeating, pointed, corrugated metal profiles. The structure is supported by a series of vertical elements, including thick concrete pillars and thinner wooden posts. The facade features a combination of materials: large sections of brickwork, smaller sections of wood paneling, and areas of smooth plaster. A small, rectangular window is visible on the right side. The drawing includes a scale bar at the bottom right, indicating a length of 180 units, and a vertical dimension of 180 units on the far right.

Architectural section drawing of a building with a gabled roof. The interior shows a sink, a tiled shower area, and a toilet. Dimensions on the right indicate a height of 0.35 and 1.75.
